Software Engineer

Apply Now

Company: Dream Games

Location: Şişli

Category: other-general

Job Description

We are looking for a passionate Software Engineer to join our team. You will contribute to all areas of game development, including programming of graphics, game logic, and user interface using Unity. It is not required to have prior game development experience since we believe a competent software engineer can develop great things in any field. You will work effectively as part of a multi-disciplinary team of engineers, artists, and game designers to create games that will be played by millions of people all around the world. At Dream Games, all team members have a genuine chance to contribute to the final product and have an impact on the company. If you want to be a team member of a fast-growing company, you might be the person we are looking for!

Responsibilities

Designing, implementing, and testing game features

Delivering well-structured code and participating in code-review sessions

Supporting and contributing new ideas to game design

Creating flexible code that can be easily updated as the product evolves

Contributing to the improvement of user experience in the games

Requirements

Strong knowledge of OOP and familiarity with Design Patterns

Experience in various programming languages such as C#, Java

Willing to learn Unity for mobile game development

Passion for games and game programming

Appreciation and understanding of teamwork

Protecting your privacy and the security of your data is a top priority for Dream Games. We collect and process your personal data as confidential as part of the recruitment process. Please read our and to know more details.
