Your dream job does exist.

Discover it at Vodafone!

We are looking for a **Solution Designer**

First things first: Our Brand.

Here are the key behaviours that help us bring our Spirit and Purpose to life:

• Earn customer loyalty: Small things do matter.

• Experiment, learn fast: Just take the chance.

• Create the future: That's possible.

• Get it done, together: It's up to each of us to make it happen.

Here, everyone can feel free to be themselves and express their ideas.

We are proud to have the most flexible #hybrid way of working in Turkey.

Together with your team, you can decide which days to come to the office depending on your work requirements.

Another favorite: Meeting-free afternoons! Every Friday, arrival of the noon means we can start to take it easy: spend time working on our personal development or catching up with our team. We call this #CumaKafası (Friday mood).

And yes we are Agile! The world is constantly changing. And we cannot afford not to!

Our journey began by simplifying our organizational model and transforming into a more agile structure that now we use extensively, especially in our development processes.

Why is this role really critical to us?

• Lead and manage Sales Force Management & Lead Management products/solutions' lifecycle, determine future opportunities for innovations/change/improvements and create communication channels in order to track user experience proactively

• Lead and manage feasibility and technical design to deliver companywide technical solution with effective management of processes and in line with agreed budgets

• After ensuring all end2end requirements of all parties are understood, deliver most appropriate solution that planned based on requested speed, quality and cost

• Works with business stakeholders to understand their business strategy and develop IT strategies and architecture for significant areas of their business.

• Leads large and complex initiatives and solutions (involving multiple departments, new/leading edge technology, integrating several technology types, high visibility and/or risk, resulting in significant organizational change)

How will you spend your time at Vodafone?

• As a member of the squad, solution designer is responsible for all the activities that lead the team to achieve their sprint goals & team KPIs.

• Supports ideation and scoping processes for scoring, feasibility and complexity of the concepts.

• Estimates size of backlog items

• Provide technical and financial (CAPEX) information including effort estimation, constraints and dependencies; highlight potential risks and offer alternative solutions

• Delivers detailed functional and technical analysis against backlog items in line with solution designers in other squads; handshakes on the specifications of the integrations points.

• Deliver end to end solutions based on agreed scope of requirements, in line with Group and TR IT's target architecture and strategy.

• Together with Ops and Infrastructure teams, studies dimensioning for the systems in the

domain based on the traffic forecast provided by the business unit

• Works with product owner and solution developer define backlog items (epics, features, user stories, tasks) for the necessary cases

• Supports testers for test case preparation; reviews test cases.

• Provides design support for defects and issues raised by relevant stakeholders regarding the domain under the teams responsibility.

• Execute RFP/RFQ/RFIs when it's required in projects and evaluate vendor technical capabilities against business requirements to identify products and/or services

• Works with solution architect to maintain product roadmaps and target architecture

• Reviews and approves vendor design documents; follow-ups vendor development.

• If assigned as a Lead Solution Designer, drives e2e design activities, ensures e2e quality of the delivery.

• Accountable for the technical vendor management based on the contract that is signed between Vodafone and the vendor.

• Work with relevant stakeholders (IT vendor management, IT Operation, Technology Security, Information Security, Legal teams) during the contract preparation phase in order to identify correct scope, KPIs, terms and conditions.

• Contribute and follow up Group business and technology plans.

• Ensure delivery standards, methodologies, processes, and best practices are implemented to ensure efficiency.

• Research to stay abreast of current technology that will keep the team operating efficiently and effectively.

• Contributes developing long-range goals.

• Comply with VFTR's information security policy, standards and procedures, available under Intranet / Corporate Security Library,

You are just the person we've been looking for, if you have:

• Bachelor's degree from Computer Science, Engineering, Information Technology or any equal to education,

• Minimum 8+ years of solution analysis/design/development/engineering experience, 4+ years of working experience in Salesforce Management and Lead Management related projects. Further, the candidate should have at least 2+ years telecom experience.

• Deep understanding of interrelated enterprise application and integration (such as ESB & API GW, Microservices etc.).

- Know-how and experience on software architecture, design and development technologies.

- Ensure the best possible performance, quality, and responsiveness of applications.

- Ability to translate business needs into the productized solution fully integrated into the enterprise.

- Broad knowledge and understanding of technical analysis and design patterns

- In depth understanding of the full software development lifecycle

- Broad knowledge of software technology and development processes, particularly Scrum, Kanban, Test Driven Development, disciplined agile delivery and lean development

- Having experience in high scalability projects involving cloud-based infrastructure design and implementation

- Having experience in creatingreviewing design documents such as CRD, HLD, LLD

- Eager to learn new technologies

- Should have communication skills sufficient to be able to work in a team of international diversity.

- Customer focused, dependable solution oriented, hardworking, team focused

- Ability to a systematic, disciplined and analytical approach to problem solving

- Result oriented, strongly motivated leader with excellent interpersonal communication, presentation and negotiation skills

- Eagerness for quality and continuous improvement of processes

- Ability to work under pressure and tight deadlines

- Very good level of English proficiency
