Sr Software Developer C#, JavaScript (Relocation Opportunity to Athens, Greece)

[Apply Now](#)

Company: PeopleCert

Location: İstanbul

Category: other-general

PeopleCert is looking for a talented **Senior Software Developer** who will be part of our **Software Development Team and will relocate to Athens, Greece** and will join the team which consists of more than 100 members, who design and develop applications that support & manage our certification exams, conducted 24x7 worldwide. Our applications are web based, build on cloud (Azure) based web services/applications using various technologies including JavaScript, Redis, oAuth, .Net, SQL server etc, iOS & android native app development and video streaming.

As a Senior Software Developer, your tasks will include the following:

Execute full lifecycle software development, writes well designed, testable, efficient code and documents the code according to PeopleCert guidelines

Participate actively in the design of the project plan and monitors its progress and reports daily the progress of allocated tasks to the manager and Project management team

Perform unit tests and preliminary debugging to ensure that the programs work as planned and reports to Software Quality Assurance team, through Wrike collaboration tool

Conduct research for innovative technologies, tools and solutions and transfers knowledge and know-how to other developers

Work effectively in a team environment and liaises with other team members to get the job done and reach the best possible results

Adhere to and implements the procedures, policies and work instructions as per the

PeopleCert Integrated Management System

Ensure their work and presence is aligned with company's values "Quality - Passion - Integrity – Innovation," at all times

What we look for:

University Degree in Informatics Technology or relevant field, Postgraduate Degree will be considered a plus

Demonstrable experience in utilizing AI-powered coding assistants like GitHub Copilot, GitLab's AI tools, or similar platforms. Familiarity with leveraging these tools for code generation, code review, and automation in software development processes is essential.

Proven ability to creatively integrate AI tools into the software development lifecycle to enhance efficiency, code quality, and innovation

Minimum of 5 years' experience as software developer

Excellent understanding of OOP, knowledge of frameworks and design patterns will be highly appreciated

Strong skills for ASP.NET, C# and JavaScript

Ability to work in a team under guidelines, using agile software development (SCRUM)

Excellent command of the English language (C2 level certification desired, LanguageCert C2 LTE or C2 IESOLcertificate would be a plus)

Excellent interpersonal, verbal, and written communication skills

Well organized, self-driven, flexible and able to work in a high-volume, fast-paced, and deadline-driven environment

What we offer:

Competitive remuneration package

Work in an international, dynamic and fun atmosphere

Two **free** vouchers for all certifications from PeopleCert's Portfolio per year for all employees

Complimentary coffee and tea in all our premises

Huge learning experience in using best practices and global environment

Constant personal and professional development

100% Virtual Hiring Process

If you want to become a member of our international, dynamic and agile team that creates world leading software products, then we should certainly like to hear from you!
