Company Siemens Enerji Sanayi ve Ticaret Anonim Sirketi Organization Transformation of Industry Business Unit Industrial Steam Turbines & Generators Full / Part time Full-time Experience Level Experienced Professional

For our Transformation of Industry Business Area for Siemens Energy in Ankara, we are looking for a Steam Turbine Commissioning Engineer to be responsible for performing the required service activities during outages of our Steam Turbine fleet equipment and reporting to the Business Unit Head.

What are my responsibilities?

Preparation, planning and execution for Commissioning & Start Up of Steam Turbine and its Systems

Perform commissioning of turbines during COLD and HOT commissioning phases, starting from single component to the full system (Turbine and auxiliaries) according to specifications, and engineering documents, including functional tests and logic interlocks verification

Review test results and prepare test reports to confirm compliance with technical specifications

Effectively identifies technical or schedule problems as they occur and takes appropriate actions to resolve including escalation of more complex issues to a higher level, providing expert advice and technical assistance to support staff and subordinate technicians of customers

Facilitate the turnover of systems from erection to commissioning and from commissioning to customer in accordance with project requirements and work instruction

Preparing as built documentation, quality records and commissioning reports

Supporting continuous improvement of process/product/system design, participating in internal review meetings, providing inputs on commissioning activities and other tasks and equipment

Develop strong relationships and interface with our customers as well as counterparts in Turkey and regional headquarters

Performs day to day activities as part of a team or as stand-alone function and other duties as assigned

Comply with the Siemens Energy standard EHS process and quality standards

What do I need to qualify for this job?

Bachelor's Degree in Mechanical / Mechatronics/Electrical Engineering

5 years of experience in field service environment

General profound understanding of technical equipment and ability to work with/based on technical documentation

Experience working with rotating equipment as gas turbines, steam turbines and generators

Good general skills in mechanical, instrument, and control activities of power generation equipment or in the Oil & Gas industry and willingness to continuously work hands-on under time pressure and in difficult conditions

Experience working at Power Plant is preferred

Knowledge of and working experience with rotating equipment especially steam turbines would be an asset

Strong analytical skills with an affinity to technology and innovation in the service industry combined with a proactive and convincing attitude

Knowledge and experience of SPPA-T3000 Control System would be an asset

Excellent communication skills, good command of written and spoken in English

What else do I need to know?

Military service should have been completed for male candidates

Having a valid driving license

In case of necessity to work on public holidays/weekend

Flexible for travelling about 70% yearly

Based in Ankara is an asset, but not mandatory remote location is also possible

About Us

Who is Siemens Energy?

At Siemens Energy, we are more than just an energy technology company. We meet the growing energy demand across 90+ countries while ensuring our climate is protected. With more than 92,000 dedicated employees, we not only generate electricity for over 16% of the global community, but we're also using our technology to help protect people and the environment.

Our global team is committed to making sustainable, reliable, and affordable energy a reality

by pushing the boundaries of what is possible. We uphold a 150-year legacy of innovation that encourages our search for people who will support our focus on decarbonization, new technologies, and energy transformation.

#### Our Commitment to Diversity

Lucky for us, we are not all the same. Through diversity we generate power. We run on inclusion and our combined creative energy is fueled by over 130 nationalities. Siemens Energy celebrates character - no matter what ethnic background, gender, age, religion, identity, or disability. We energize society, all of society, and we do not discriminate based on our differences.
