

Technical Support Engineer, Gebze Plant - Turkey

[Apply Now](#)

Company: Fater

Location: Gebze

Category: other-general

We are currently seeking **Technical Support Engineer** to join our team at our Gebze Plant. In this role, you will:

Be responsible for the systems that support Building, Fixtures and Production, which are under the responsibility of the TSG department

Lead the creation of the technical specifications of the projects by checking the technical requirements and qualifications in new investments or technical revisions to be made in existing investments.

Monitor energy use and be responsible for the establishment and development of the necessary monitoring systems for the most effective use.

Establish the right communication between the IT department employees who own the computer systems of the production facility and the user or other department technical teams and creation of the right business plans

Support the processes of correct communication and creation of business plans by participating in the business processes of department employees with other departments

Participate in the necessary action studies to comply with the KPI targets determined by the factory management and department managers, to support the affiliated or other

departments in finding new projects with its technical knowledge in order to comply with the targets

Participate in the certification and training processes related to the quality and management systems being implemented in the production facility, and participate in studies so that the requirements of these systems can be applied in accordance with their own department and/or other departments.

In the absence or approval of the TSG Manager, you will approve the work permit processes or support the progress of the process by giving feedback to eliminate the nonconformity

Support the management team in making the necessary plans by following the department and other department processes, determining the training needs of the department
