Technology Lead

Apply Now

Company: HOO KOO E KOO

Location: Adana

Category: other-general

At HOO KOO E KOO (Permanent / Contractor), in Poland

Expires at: 2024-10-14

Remote policy: Full remote

HOO KOO E KOO is a global brand and product studio. We help create a better future

for humanity and the planets.

We collaborate on projects that disrupt markets, provide a leap in human experience, and move

toward a more sustainable existence on this planet. We work with organizations who have the

ideas, brainpower, resources, and drive required to generate substantial, meaningful impact.

We are a community of pragmatic visionaries, accomplished and well established in our

respective crafts, with a shared will to harness our talents for good.

Our development team model is therefore rather unique. Our studio is not only fully remote

but fully contract-based (no FTE); we source and create lasting bespoke teams custom to

the needs of each of our projects and clients. And it is our Technology Director who leads

the development arm of our abilities to deliver these meaningful and future-facing projects.

Role

Our Technology Director is a seasoned full-stack engineer with past experience building consumer-facing websites, applications, and platforms from the ground up. In this role you will provide sound technical leadership to all aspects of our business. You will communicate with the company partners, management, vendors, and clients to ensure our company's technologies are used efficiently.

Strategic thinking and strong business acumen are essential in this role. We expect you to be well-versed in current technological trends and familiar with a variety of business concepts.

This position is a key role in the company helping to grow the business and allowing us to continue to build a strong remote work/life culture.

Main requirements

Oversee all aspects of the engineering teams dedicated to each project. This includes technical strategy, coding, evaluation vis a vis managing the end-to-end technological execution of our projects.

Continue to develop technical aspects of the company's (legacy) strategy to ensure alignment with its business goalsFull Remote
