

Turkey Marine Ships in Service Senior Surveyor

[Apply Now](#)

Company: RINA

Location: İstanbul

Category: other-general

Job Responsibilities

1. Professional Specialist:

- Acts as a professional specialist, applying in-depth knowledge of Rules, Regulations, and industry concepts.
- Keeps abreast of new developments and recommends changes to surveying processes and safety programs.

2. Inspection and Reporting:

- Conducts routine surveys on classed ships, platforms, or marine structures to ensure compliance with classification and statutory requirements.
- Prepares technically accurate and timely reports of inspections and surveys.

3. File Maintenance:

- Maintains survey files in an organized and up-to-date manner within the designated area of responsibility.

4. Leadership and Coordination:

- Plans, schedules, and coordinates various phases of surveying work.
- Monitors the quality of service, providing leadership and guidance to lower-level and less experienced surveyors.

5. Client Interaction:

- Engages with clients to solve problems within the area of expertise.
- Ensures client satisfaction through effective communication and resolution of issues.

7. Training and Development:

- Provides leadership, guidance, and training to lower-level and less experienced surveyors.
- Contributes to the development and improvement of the skills and knowledge of the surveying team.

8. Quality Assurance:

- Monitors work and projects performed by subordinate surveyors, ensuring the maintenance of quality, content, consistency, and continuity of work performed.

9. Problem Resolution and Innovation:

- Recommends new approaches to problems encountered and initiates changes in working methods and procedures as necessary.
- Actively contributes to the development and enhancement of surveying practices.

10. Ethical Conduct:

- Uphold the highest ethical standards in all professional interactions, ensuring integrity, transparency, and fairness in survey processes.

Education

Master's Degree in Naval Engineering

Qualifications and skills

- Minimum 3 years experience working as a Surveyor.
- Minimum 5 years' experience in the engineering or inspection/survey fields with an IACS member Classification Society.
- Proficiency in the English language commensurate with the scope of classification, statutory certification, related services and, before assignment, with their future work.
- Ability to develop a working knowledge of RINA Rules, Guides, statutory regulations, and related instructions, as well as the RINA Employee Safety Policy.
- Ability to understand engineering plans and have a knowledge of shipbuilding practices and ship operations.
- Ability to perform new building surveys:
 - to assess the suitability of certified materials and products supplied for the new building,
 - to assess that hull, machinery and equipment have been built in compliance with rules and regulations by means of compulsory inspections, tests and trials,
 - to identify the deficiencies to be rectified (if any) and assess whether immediate repair is necessary or a recommendation may be issued with an appropriate due date,
 - to issue Certificates, Reports, Records and Status in compliance with rules and regulations.
- Ability to perform ship in service surveys:

- to assess and follow-up the repair works to hull, machinery and equipment to assign a new period of Class and a new period of validity to statutory Certificates in compliance with rules and regulations by means of overall and close-up inspections, verification upon dismantling, tests and trials (including surveys for Admission to Class of ships in service),
- to attend major conversion works according with rules and regulations,
- to identify the deficiencies to be rectified (if any) and assess whether immediate repair is necessary or a recommendation may be issued with an appropriate due date,
- to follow-up as required by rules and regulations any repair work or due to previous outstanding recommendations,
- to assess whether the deficiencies identified (if any) may be linked with potential failure of the Ship Management System,
- to issue Certificates, issue Reports and Status in compliance with rules and regulations.
- Knowledge of ship engineering systems and machinery.
- Knowledge of computer programs or software packages related to job responsibilities.
- Knowledge of related technical interfaces required for group project work.

#LI-MP2

With over 5,000 employees and 200 offices in 70 countries worldwide, RINA is a multinational player which provides certification, marine classification, product testing, site supervision and vendor inspection, training and engineering consultancy services across a wide range of sectors. Our business model covers the full process of project development, from concept to completion. The aim is to guarantee a project's technical, environmental and safety - and sometimes also economic and financial - sustainability. At RINA, we endeavor to create a work environment where every single person is valued and encouraged to develop new ideas. We provide equal employment opportunities and are committed to creating a workplace where everyone feels respected and safe from discrimination or harassment of any kind. We are also compliant to the Italian Law n. 68/99.
