

## UX/UI Designer -

[Apply Now](#)

Company: Makeen Technologies

Location: Istanbul

Category: other-general

We're looking to expand our team with a full-time UI/UX designer.

As a UI/UX designer, you'll have the ability to work on mobile and web app interfaces, websites, and branding. Your job will be mainly focused on creating user interfaces, doing user research, usability testing, and information architecture development. You will work closely with the lead designer and development team.

Our team works remotely and communicates mostly using text, so you need to have good communication skills and written English. This is a full-time position (about 30-40hrs / week).

Requirements:

- 1 . Passionate about the web, product design, and problem-solving.
- 2 . Able to create interface design based on wireframes for mobile (iOS and Android) and web apps
- 3 . Ability to create and maintain design systems
- 4 . Ability to work on brand guidelines and support them
- 5 . Cooperate with developers, check and review final implementations of the design
- 6 . Experience working in Sketch Bonus points

Experience or history of working as part of a remote team or organization.

Experience in creating interaction design prototypes (Flinto, Principle, Adobe After Effects) Your application/proposal needs to include:

Short cover letter to tell a few words about yourself

Links to your portfolio (2 mobile apps and 2 web apps)
